

SARAN S

Platform Engineer | DevOps Engineer | Azure Cloud Infrastructure

Chennai, India • saransivakumar.work@gmail.com • 8056015473

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 3+ years of experience designing, automating, and supporting Azure cloud infrastructure for enterprise-scale environments. Hands-on expertise in Infrastructure as Code (Terraform), CI/CD automation, Kubernetes (AKS), cloud monitoring, security, and production operations. Experienced in incident management, cloud cost optimization, compliance documentation, and operational automation using Python and PowerShell. Passionate about building reliable, secure, and scalable cloud platforms while improving engineering efficiency through automation.

TECHNICAL SKILLS

- **Cloud Platforms:** Microsoft Azure (Primary), AWS (Working Knowledge)
- **DevOps & CI/CD:** Azure DevOps, Jenkins, Git, GitHub, Azure Repos, GitHub Actions
- **Infrastructure & Containers:** Docker, Kubernetes (AKS), Azure Virtual Machines, VM Scale Sets
- **Infrastructure as Code & Automation:** Terraform, ARM Templates, Azure CLI, PowerShell, Bash / Shell scripting, n8n
- **Monitoring & Operations:** Azure Monitor, Log Analytics, Application Insights, Incident Management, RCA, On-call Support, Prometheus, Grafana
- **Networking & Security:** Azure RBAC, NSGs, Azure Policy, Key Vault, ISO 27001, User Access Reviews
- **Systems:** Linux (Ubuntu), Windows Server, Networking (DNS, TCP/IP, Load Balancer)

PROFESSIONAL EXPERIENCE

Capgemini — Senior Cloud & DevOps Engineer

Project: Microsoft

CHENNAI, INDIA
Apr 2023 – Present

- Managed and supported Azure cloud environments, ensuring systems were stable, secure, and available for business-critical workloads.
- Implemented RBAC and policy-based access controls, helping improve security posture and reduce unauthorized access risks.
- Handled production incidents (P1/P2), analyzed logs and metrics, and reduced recurring issues by identifying root causes and applying fixes.
- Worked on vulnerability fixes by identifying configuration gaps and coordinating remediation across services.
- Built and maintained CI/CD pipelines using Azure DevOps and GitHub Actions, helping streamline deployments and reduce manual intervention.
- Provisioned infrastructure using Terraform and ARM templates, bringing consistency across environments and reducing deployment time.
- Deployed and supported applications on AKS, handling scaling issues, service communication problems, and runtime failures.
- Automated routine operational tasks using PowerShell and Python, saving several hours of manual work each week.
- Set up monitoring and alerting using Azure Monitor and Log Analytics, improving issue detection and response time.
- Automated monthly Azure cost reports and weekly health reports, improving visibility for stakeholders and reducing reporting effort.
- Prepared ISO-related documentation and audit evidence, supporting compliance requirements and internal reviews.
- Collaborated with development and data teams to ensure smooth deployments and faster issue resolution.
- Led automation of Azure cost reporting and operational health reporting using Python, PowerShell, and Azure services, eliminating manual effort and providing actionable insights for platform governance and cost optimization.
- Improved cloud observability by optimizing Log Analytics workspaces, developing monitoring dashboards, and implementing proactive alerting strategies that enabled faster incident detection and troubleshooting across production environments.

KEY PROJECTS

Azure Platform Automation

Automated User Access Reviews, audit evidence generation, cloud governance reporting, and operational workflows using PowerShell, Azure CLI, and Python.

ADLS Gen1 to Gen2 Migration

Performed enterprise-wide discovery, dependency analysis, migration planning, and automation across Azure subscriptions.

Incident Intelligence (AI Initiative)

Designed an AI-assisted incident investigation framework leveraging KQL, Agent Studio, and GPT-based workflows to accelerate incident analysis and root cause identification.

Azure Automation Migration

Migrated Azure Function-based operational processes to Azure Automation Runbooks while resolving enterprise authentication and policy constraints.

EDUCATION

BITS PILANI (WILP) — M.TECH, CLOUD COMPUTING

2025–2027

SRM VALLIAMMAI ENGINEERING COLLEGE — B.E., MECHANICAL ENGINEERING

2018–2022

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: DP-700
- Databricks Certified Data Engineer Associate
